# The Sprint Time-box

# The Sprint Container Event

**Sprint Planning**

**Daily Scrum**

**Sprint Review**

**Sprint Retrospective**

# Scrum Events / Ceremonies

A **time-box** within which a Scrum Team will perform planning, coordinating, inspecting and adapting activities

# Increment

The Increment is the sum of all the Product Backlog items completed during a Sprint and the value of the increments of all previous Sprints.

# Releasing the Increment

- Always useable (meets the “Definition of Done”)
- May be useful
- Scrum supports continuous deployment

# The Sprint Planning Event

---

# A Sample PSM Exam Question

**What are the two key topics addressed in Sprint Planning?**

- a) Choosing the Sprint Goal
- b) Selecting the work to do in the sprint**
- c) Evaluating the Development Team's capacity
- d) Planning how the sprint work will be done
- e) Selecting the length of the sprint

# A Sample PSM Exam Question

**What are the two key topics addressed in Sprint Planning?**

- ~~a) Choosing the Sprint Goal~~
- b) Selecting the work to do in the sprint**
- c) Evaluating the Development Team's capacity**
- d) Planning how the sprint work will be done**
- e) Selecting the length of the sprint**

# A Sample PSM Exam Question

**What are the two key topics addressed in Sprint Planning?**

- ~~a) Choosing the Sprint Goal~~
- b) Selecting the work to do in the sprint**
- ~~c) Evaluating the Development Team's capacity~~
- d) Planning how the sprint work will be done**
- e) Selecting the length of the sprint**

# A Sample PSM Exam Question

**What are the two key topics addressed in Sprint Planning?**

- ~~a) Choosing the Sprint Goal~~
- b) Selecting the work to do in the sprint**
- ~~c) Evaluating the Development Team's capacity~~
- d) Planning how the sprint work will be done**
- ~~e) Selecting the length of the sprint~~

# Topic One: What Can Be Done in This Sprint?

**Product Owner**

**Development Team**

A well-managed Product Backlog

An assessment of Dev Team's capacity

A history of work completed

A product increment

## Topic Two: How Will Chosen Work Be Done?

**Product Owner**

**Development Team**

# Renegotiating the Work

## Sprint Start

## Later On

# Sprint Planning Guests

# Sprint Planning Guests

# Sprint Planning Success!

## Product Backlog

## Sprint Backlog

# Sprint Planning's Two Topics

**What Can We Do?**

**How Will We Do It?**

# Sprint Planning Time-boxes

*If the sprint is...*

4 weeks

2 weeks

1 week

*The time-box is...*

8 hours

4 hours

2 hours

# Sprint Planning Participants

**Product Owner**

**Scrum Master**

**Development Team**

# The Daily Scrum Event

---

# Daily Scrum (aka Daily Stand-Up)

The Daily Scrum is NOT a  
status meeting!

Scrum doesn't have  
status meetings!

# Daily Scrum

What did I  
accomplish  
since  
yesterday?

What am I  
planning to  
do today?

Any  
impediments?

# A Sample PSM Exam Question

**Who are the mandatory attendees of the Daily Scrum?**

- a) The Development Team
- b) The Scrum Master
- c) The Product Owner
- d) The Product Owner's manager
- e) The QA analyst

# Daily Scrum

What did I  
accomplish  
since  
yesterday?

What am I  
planning to  
do today?

Any  
impediments?

Daily Scrum

Planning

Accounting  
Alignment

# Daily Scrum Attendees

# Daily Scrum Attendees

**Manager**

# Daily Scrum Scheduling

# A Sample PSM Exam Question

A Development Team member reports that they didn't get their work done from yesterday's Daily Scrum, and they don't know when they'll complete their task. What should happen next?

- a) The Scrum Master should teach the team member techniques to estimate their work more accurately
- b) The Scrum Master should not get involved because they are an optional attendee to the Daily Scrum
- c) The Scrum Master should encourage the Development Team to assess how this might affect their Sprint Goal
- d) The Scrum Master should report the lack of progress to the Product Owner to ensure transparency

# A Sample PSM Exam Question

A Development Team member reports that they didn't get their work done from yesterday's Daily Scrum, and they don't know when they'll complete their task. What should happen next?

- a) The Scrum Master should teach the team member techniques to estimate their work more accurately
- b) The Scrum Master should not get involved because they are an optional attendee to the Daily Scrum
- c) The Scrum Master should encourage the Development Team to assess how this might affect their Sprint Goal
- d) The Scrum Master should report the lack of progress to the Product Owner to ensure transparency

# A Sample PSM Exam Question

A Development Team member reports that they didn't get their work done from yesterday's Daily Scrum, and they don't know when they'll complete their task. What should happen next?

- ~~a) The Scrum Master should teach the team member techniques to estimate their work more accurately~~
- b) The Scrum Master should not get involved because they are an optional attendee to the Daily Scrum**
- c) The Scrum Master should encourage the Development Team to assess how this might affect their Sprint Goal**
- ~~d) The Scrum Master should report the lack of progress to the Product Owner to ensure transparency~~

# A Sample PSM Exam Question

**What is required in the Sprint Review?**

- a) External stakeholder attendance (manager, directors)
- b) Formal Product Owner acceptance of the Dev Team's work**
- c) Inspection of the “Done” work on the product Increment
- d) A burnup chart showing progress towards the future delivery date
- e) Adaptation activities, as needed, like revising the Product Backlog

# A Sample PSM Exam Question

**What is required in the Sprint Review?**

- ~~a) External stakeholder attendance (manager, directors)~~
- b) Formal Product Owner acceptance of the Dev Team's work**
- c) Inspection of the “Done” work on the product Increment**
- d) A burnup chart showing progress towards the future delivery date**
- e) Adaptation activities, as needed, like revising the Product Backlog**

- e) Adaptation activities, as needed, like revising the Product Backlog**

# The Sprint Retrospective

---

# Lessons Learned vs. Retrospectives

## Lessons Learned in Waterfall

Often done only at the end of a project or a major phase of a project

Often done in a politically sensitive environment where participants are not free to speak safely

Often the “lesson learned” are not easily stored or managed

Often the “lessons learned” are not referred to in future project

## Sprint Retrospective in Scrum

Done frequently – at the end of every sprint (so, at least once every 30 days, usually more frequently than that)

Done in a team-only environment free from outsiders, so the team can speak freely and safely

At least one specific action is included in the next sprint’s Sprint Backlog

Encourages continuous improvement so the team’s future work is enhanced

# Sprint Retrospective Time-boxes

*If the sprint is...*

4 weeks

2 weeks

1 week

*The time-box is...*

3 hours

90 mins

45 mins

# Sprint Retrospective Participants

**Product  
Owner**

**Scrum  
Master**

**Development Team**

# Sprint Retrospective

What went well  
for us?

What didn't go  
well?

How can we  
improve our way  
of working?

# A Sample PSM Exam Question

**What is the purpose of the Sprint Retrospective?**

- a) Inspect how the last Sprint went with regards to people, relationships, process and tools
- b) Identify and order the major items that went well, and potential improvements
- c) Create a plan for implementing improvements to the way the Scrum Team does its work
- d) Create a report for senior management that explains what the Scrum Team will improve in the next sprint
- e) Assign action items to specific team members for follow-up in the next Retrospective meeting

# A Sample PSM Exam Question

**What is the purpose of the Sprint Retrospective?**

- a) Inspect how the last Sprint went with regards to people, relationships, process and tools
- b) Identify and order the major items that went well, and potential improvements
- c) Create a plan for implementing improvements to the way the Scrum Team does its work
- d) ~~Create a report for senior management that explains what the Scrum Team will improve in the next sprint~~
- e) Assign action items to specific team members for follow-up in the next Retrospective meeting

# Product Backlog Refinement

# Product Backlog Refinement

**Not more than  
10% of the  
Development  
Team's  
capacity**

# Product Backlog Refinement

## Summary

A Sprint is a time-boxed container for the other time-boxed Scrum events

Sprint Planning addresses two topics:  
What can we do? How will we do it?

Sprint Review inspects the product Increment and adapts the Product Backlog. External stakeholders welcome!

Daily Scrum is a 24-hour planning, alignment, and accountability meetings

Sprint Retrospective inspect and adapts how the team is working together

There are no status meetings in Scrum!
